Narrative

Continuations:

Fernisa June Sison is the decedent.

Narrative:

On 09-02-19, at approximately 0516 hours, the Santa Barbara Sheriff's Office was notified by the Ventura Fire Department of a vessel on fire in the Channel Islands off the coast of Santa Barbara County. The Coast Guard responded along with Ventura Fire Department and Santa Barbara County Fire Department. Upon arrival at the scene the vessel was found to be fully engulfed in fire. The call had originally come into the Coast Guard at 0332 hours, on 09-02-19.

Reports to the Coast Guard said there were possibly be 34 subjects trapped below the water line, in the vessel.

The vessel was identified as the "Conception" and it was in jurisdiction of the Santa Barbara Sheriff's Office near Santa Cruz Island, not in Ventura Sheriff's Department jurisdiction. The location was later found to be 300 yards off shore of Platts Harbor on Santa Cruz Island. See Santa Barbara County Sheriff's Department case number 19-11415 for full details.

Sgt. Morris was notified of the incident by Sergeant Valencia. Sergeant Morris requested the response of Detective Henslin, Detective Biedinger, and Detective Carlson to the Coroner's Bureau to assist in the incident at approximately 0525 hours.

Detective Baisa was also called at that time and asked to respond to Ventura Harbor to act as the liaison for the

Supplement No
ORIG

Narrative

Sheriff's Office.

It was later found the vessel, the "Conception" contained 33 passengers and six crew members. Five of the crew members were rescued, but none of the 33 passengers had been found.

During the course of the morning four deceased passengers had been located by Coast Guard personnel. The Coast Guard transported the decedents to the Santa Barbara Harbor.

At 1150 hours, on 09-02-19, Sgt. Morris, Detective Henslin and Detective Biedinger responded to the Santa Barbara Harbor to retrieve decedents documented as 1 through 4.

At 1220 hours, on 09-02-19, the decedents were brought to Santa Barbara Harbor. Detective Henslin and Detective Biedinger transported two decedent's each to the Santa Barbara Coroner's Bureau, where physical examinations were later conducted on them.

At that time digital photographs were taken of the decedents along with samples collected for DNA analysis identification and for an expanded toxicology panel. All of the decedents retrieved on 09-02-19, were found to have significant thermal burns to their bodies with limbs missing due to the intensity of the fire. None of the decedents could be identified by physical characteristics.

At 2030 hours, on 09-02-19, Sgt Morris, Det. Biedinger, Det. Henslin, Det. Carlson, Det. Baisa, Deputy Bruening and staff from the Los Angeles County Coroner's Office responded to the Santa Barbara Harbor for retrieval of 16 additional bodies recovered from the Conception, documented as decedents 5 through 20.

The decedents were then transported to Coroner's Bureau for examinations, drawing of fluids for toxicology and DNA analysis, and collection of personal property.

At approximately 2330 hours, on 09-02-19, all the examinations of the decedents were completed and the decedents were placed in a portable morgue provided by the Los Angeles County Coroner's Office.

On 09-03-19, at 1930 hours, Sgt Morris, Det. Biedinger, Det. Henslin, Det. Carlson, Det. Baisa, Deputy Bruening and staff from the Los Angeles County Coroner's Office responded to the Santa Barbara Harbor for retrieval of 13 more remains recovered from the Conception, documented as decedents 21 through 33.

The decedents were then all transported to the Santa Barbara Coroner's Bureau, where physical examinations, digital photographs, and fluid samples for DNA analysis and toxicology where conducted on each recovered decedent.

All of the decedents recovered on 09-03-19 were placed on portable coroner racks and secured in the Santa Barbara Coroner's Bureau morgue.

On 09-09-19, at approximately 1400 hours, Pathologist Dr. Manny Montez, Detective Henslin, Detective Baisa, and Sgt. Morris, along with representatives from the FBI and ATF performed tracheal examinations of the remaining decedents at the Coroner's Bureau.

09-10-19, at approximately 1830 hours, Detective Baisa met with Santa Barbara Sheriff's Department Sgt. Nelson, at the National Park Service, 1901 Spinnaker Drive in Ventura, Ca. Sgt. Nelson provided Detective Baisa with a bag of suspected human flesh, a backpack and an air vent from the Conception that had suspected human hair embedded in it. The suspected human tissue and other items were found in the bow of the Conception.

The items later numbered 35 and 36 were transported to the Santa Barbara Coroner's Bureau where digital photographs were taken of the suspected human tissue and suspected human hair, which was removed from the vessel air vent.

The suspected human tissue and hair were later flown to the Sacramento County Coroner's Office in Sacramento, Ca., under the care of Sgt. Morris and Deputy Bruening for DNA analysis.

At approximately 1330 hours, on 09-11-19, Detective Henslin and Detective Biedinger responded to Santa Barbara Harbor, after Divers from the Los Angeles Police Department located the remains of a decedent, near the location of the Conception fire. The Los Angeles Police Department collected the remains, with a section of hair,

ORIG

Narrative

documented as numbers 37 and 38.

The decedent and the remains were then transported to the Santa Barbara Coroner's Bureau, where a physical examination, digital photographs, and fluid samples for DNA analysis and toxicology were conducted on the recovered decedent.

The sample of collected hair was packaged and sent along the DNA samples of decedent number 37 for DNA analysis in Sacramento California, under the care of Detective Henslin, who flew to the Sacramento Airport and provided the samples to Sgt. Morris who was still in Sacramento.

The samples were then taken to the Sacramento County Coroner's Office, for DNA analysis.

Physical evidence:

A series of digital photographs were taken of the decedent at the Coroner's Bureau by Forensic Personnel from the Santa Barbara Sheriff's Department. The photo card was later downloaded for storage at the Coroner's Bureau.

Identification of decedent:

The decedent was positively identified by a DNA comparison, with samples submitted by the decedent's son, Dominick Selga. The DNA comparison was conducted via the Sacramento County Coroner's Office.

Examination of decedent:

Once the decedent was received at the Santa Barbara County Coroner's Morgue, a physical examination was conducted at the Coroner's Bureau. The decedent was received partially clothed and supine within a black colored body bag. A tag with case #19-11425 was attached to the body bag.

The decedent was not identifiable due to extensive and severe postmortem thermal injuries. Severe 4th degree thermal burns were present. There were no recognizable facial features. The skull was partially burned away. The decedent was clothed in black cloth pants. This clothing was cut from the body.

The chest and abdomen were charred from extensive 4th degree thermal burns. The burns extended through muscle and fatty tissue.

The upper legs displayed 4th degree burns. Both legs were burnt over their entirety, with the lower legs and feet displaying third degree burns.

The arms displayed extensive 4th degree burns with charring at the ends. The hands had been burnt away. Partial arms remained on the decedent. The decedent could not be identified via latent fingerprint comparison.

The decedent was rolled to her side and the rear of the body was examined. The entirety of the back of the torso and buttocks displayed 4th degree burns. The tissue was cracking and displayed fatty tissue beneath the skin. A tribal tattoo was noted above the buttocks on the small of the back and was instrumental in the identification of the decedent. There were no indications of a struggle or defensive wounds to the decedent, specifically the hands, arms, and chest.

1 tube of heart blood was submitted to Alere Forensics for toxicology analysis. The remaining fluid samples were refrigerated at the Coroner's Bureau pending a need for toxicology analysis.

Post mortem examination:

Due to the severity of the decedent's injuries and in consideration of the circumstances associated with this tragic incident including: Extensive vessel fire which consumed the craft below the water line resulting in all decedents being submerged with the wreckage. All decedents were recovered by open water and confined space divers. Following a review of these circumstances and a physical examination of all decedents, a post mortem examination was deferred.

Forensic toxicology:

On 09-12-2019, a toxicology report was received from Alere Forensics regarding the decedent's carbon monoxide saturation. The report indicated the following:

ORIG

Narrative

Carbon monoxide 64%

On 9-13-19, a toxicology report was received from Alere Forensics regarding the decedent's cyanide saturation. The report indicated the following:

Cyanide < 1 mcg/mL

The reports were reviewed with Dr. Manny Montez and found to be contributive to the decedent's death.

On 9-28-19, a toxicology report was received from Alere Forensics regarding a toxicology screen. The report indicated the following:

Expanded Drug Screen Positive Findings:

Meclizine 25 ng / mL

Trazodone 158 ng / mL

m-Chlorophenylpiperazine 16 ng / mL

Bupropion 49 ng / mL

Hydroxybupropion 136 ng / mL

Ondasetron Presumptive

Volatiles

(EtOH, IPA, MeOH, Acetone) None Detected

The report was reviewed with Dr. Manny Montez and found to be non-contributive to the decedent's death.

Consultations with Forensic Pathologist:

I reviewed the circumstances surrounding this death with Dr. Manny Montez. Dr. Montez opined that the decedent died as a result of smoke inhalation due to boat fire.

In review of the circumstances of this death:

On 09-02-19, at approximately 0443 hours, 57 year-old, Fernisa Sison died from traumatic injuries sustained when the vessel she was on caught fire, burned to the water line and sank. Sison had been a passenger on the chartered dive boat, Conception.

Cause of Death:

It was determined that the decedent (SISON) died as a result of the following cause;

SMOKE INHALATION (MINS)

Due to:

BOAT FIRE (MINS)

Manner of death:

The manner of death will be certified by the Office of the Coroner as ACCIDENTAL.

Final Disposition:

The decedent was released to representatives of Welch Ryce Haider Mortuary in Santa Barbara, Ca. No property or medication was collected.

Summary Narrative

This report contains information in reference to the Coroners request for Forensics assistance in photo documenting the bodies recovered from the Conception Boat Fire Incident.

Narrative

E-FILE ATTACHMENTS:

None

NARRATIVE:

On Monday, 09/02/19, at 1904 hours, Forensics Supervisor Nancy Fabela advised that our assistance was requested by the Coroner's Office for the mass casualty that had occurred earlier in the morning off the Santa Cruz Island. They were requesting assistance with photo documenting the recovered bodies from the Conception boat fire, and if possible, rolling fingerprints for identification purposes. Coroners Sergeant Jarrett Morris was requesting we meet at the Coroners Office at 2100 hours.

At approximately 1955 hours, CSI Tech Melissa Sandoval and I left the North County Forensics Office, and arrived at the Coroner's Bureau at 2100 hours.

Upon our arrival we met with Patrol Sergeant Mike McCoy and several Los Angeles County Coroners Office personnel were also standing by in the parking lot.

At approximately 2140 hours, our Coroners Bureau detectives arrived with the bodies.

PHOTO DOCUMENTATION (Decedent #7, female):

On Monday, 09/02/19, at 2213 hours, I began overall photo documentation on a female decedent. Her body was on a body bag with a Santa Barbara County Sheriff's Coroner tag hanging from the zipper. Her body was badly burned. The bottom portion of her left leg, which had a black legging on it, was not as burned as the rest of her body. The toenails on her left foot were a hot pink color. Overall photo documentation of her unclothed body was also taken. When she was turned to her side, a small tribal tattoo was observed on her lower back.

Photo documentation was completed at 2224 hours.

***Should be noted that when the LA County Coroners Office personnel moved her body to zip the body bag up, they noticed a single, dark colored left Ugg boot (size 6) under her body. Photo documentation of the boot was taken and completed at 2228 hours.

Supervisor Fabela, CSI Tech Sandoval and myself left the Coroner's Bureau at 0020 hours, on Tuesday, 09/03/19.

All digital photos were later uploaded into the South County Forensics digital imaging computer for future
