Douglas:

The following covers the equipment Andrew and his wife Adrian took on the Conception.

This info was provided to the FBI at the time of the tragedy.

Hoping you have a great Sunday and stay healthy.

I want to include this equipment info. also, just in case. These are the pieces of the underwater camera housing he had with him. I don't know if they contain batteries or not, but his camera would have been inside this housing, and his SolaPro light may have been attached somehow...

Ikelite DL200 Underwater Housing (Andrew listed model #, but no serial # on his spreadsheet): <https://www.ikelite.com/products/200dl-underwater-housing-for-nikon-d810-dslr-cameras>

Also interesting... the new light I think he had with him (Sola Pro listed in original email) has since been discontinued apparently: <https://www.backscatter.com/Light-Motion-Sola-Video-Pro-12-000-Underwater-Video-Light>

Here's a quick list of equipment that I know they had with them that included batteries... the link below is to a photo album with pictures that include the applicable model/serial numbers.

Dell XPS 15

Nikon Camera Body

Light & Motion SolaPro 12000 video light

Samsung Galaxy S9 phone

I am checking with Darin/Lacey/Josh to see if they recall the model of Andrew's phone. Unfortunately, that info. is not in his TMobile account like Adrian's. I will send along if I am able to determine.

Love you,
Angela
